Viewing Grades - Tests/Quizzes

You can view your grades from within your course in Blackboard. Scores may automatically display for tests and quizzes. Some questions require the teacher to grade them.

1. From within the course, click the Grades menu link.

2. You will see one of these icons under “Grade” until a grade has been assigned to you.

3. Below is an example of how these icons look in the Gradebook. It will display the date you submitted the assessment.
4. Click on the name of the test/quiz for additional information. If there is a balloon icon, click on it for instructor feedback.

5. Click the score under *Calculated Grade* to view the test questions and results available to you.

6. You can view the questions with answers you submitted, the correct answer, and how many points each question is worth. **Note: A test may be set to show the feedback after the submission, after the due date, or after the instructor has graded all the tests. The feedback could be just the score, the score with your selected answer, or the score with all possibilities. If you do not immediately see feedback, check with your instructor to see when or if this will be made available to you.**
